

**CLEAN WATER ACT COMPLIANCE INSPECTION
U.S. ENVIRONMENTAL PROTECTION AGENCY, REGION 5**

Purpose:

Determine compliance with the Clean Water Act

Facility:

Legend Farms Dairy, LLC

Ex. 6.(Personal Privacy)

Kewaunee County

Ex. 6 (Personal Privacy)

NPDES Permit Number:

None

Date of Inspection: April 20, 2017 - April 21, 2017

EPA Representatives:

Cheryl Burdett, CAFO Program Manager

312-886-1463

Burdett.cheryl@epa.gov

Ben Atkinson, Agronomist

312-353-8243

Atkinson.benjamin@epa.gov

Wisconsin Department of Natural Resources Representative:

Kody Hansen, Environmental Enforcement Specialist

Kody.Hansen@Wisconsin.gov

Facility Representatives:

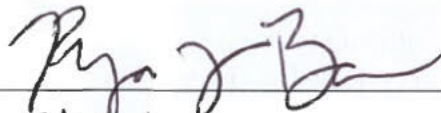

None

Inspector Signature:

Approver Title: Ryan Bahr, Section 2 Chief, Water Enforcement and Compliance Assurance Branch

Approval Signature:

Approval Date:

5/16/18

On April 20, 2017, EPA conducted an unplanned reconnaissance inspection along the public road right-of-ways near Legend Farms Dairy, LLC (Facility). EPA was there to observe whether the alleged discharges observed on May 26, 2016 had been remedied as claimed by the photographs Ex. 6.(Personal Privacy) e-mailed to Kevin Chow, EPA Office of Regional Counsel on August 25, 2016. Upon their arrival at approximately 8:30 AM, EPA inspectors observed two discharges off of the west and east sides of the silage pad into the roadside ditches as documented in photo numbers P4200017-P4200026. One flow path originated on the west side of the silage pad and flowed southwest to the roadside ditch along the north side of County Road F. The second flow path originated on the east side of the silage pad and discharged off of the east side of the silage pad and into the roadside ditch along the west side of Lilac Lane and continued to flow south into County Road F roadside ditch. EPA observed that feed and surface runoff (process wastewater) from the silage pad was discharging in the flow paths. EPA also observed that Lilac Lane was the high point in the surrounding terrain and all liquid in the roadside ditch appeared to originate from the Facility. The process wastewater flowed through two culverts along County Road F as identified in this report as 1st driveway west of Lilac Lane and 2nd driveway west of Lilac Lane. The process wastewater flowed through the culvert under the 2nd driveway west of Lilac Lane and into a tile inlet as documented in photo P4200019.

EPA observed an additional tile riser located in a swale on the south side of County Road F documented in photo numbers P4200027 - P4200031. EPA believed that this may have been the outlet location of tile inlet on the north side of County Road F. EPA collected samples at the culvert outlet located on the south side of County Road F and documented sample collection in photo number P4200031. EPA lists the samples collected, parameters that were analyzed and the results in Attachment A. In an attempt to confirm that the sampling location had been correct, EPA contacted the Wisconsin Department of Natural Resources (WDNR). WDNR agreed to meet EPA on April 21, 2017 along County Road F and show EPA where the tile would outlet.

On April 20, 2017 at approximately 12:00 PM, EPA drove to the Kewaunee County Highway Office to inquire where the public road right-of-ways are located along County Road F. The Kewaunee Highway Commissioner brought up on his computer the location of where EPA wanted to collect samples and explained that from the center of the line on County Road F, the public road right-of-way extends 50 feet from the center of the road. The Highway Commissioner printed EPA a map with the public road right-of-ways (Attachment D).

On April 21, 2017 at approximately 11:00 AM, WDNR met EPA along County Road F and identified the tile outlet location for the tile inlet located on the north side of County Road F south of Legend Farms Dairy, LLC as documented in photos P4210068 – P4210071. EPA measured the distance from the center of County Road F to verify that EPA was within the 50 feet of the public road right-of way and collected samples as documented in photo numbers P4210064-P4210067. EPA also collected a sample prior to the process wastewater entering the tile inlet located on the north side of County Road F in the roadside ditch on the same side of the road as Legend Farms Road, LLC as documented in photo numbers P4210083-P4210088. EPA again measured the distance from the center of the road to where the discharge flowed into the tile inlet and confirmed that EPA was within the public road right-of-way as documented in

P4210082. After collecting samples EPA left the area and headed to a nearby gas station to preserve the samples and write out the chain of custody.

EPA's purpose for collecting samples along the public road right-of-way of County Road F and Lilac Lane on April 20 and 21 was to determine whether pollutants were discharging from the Legend Farms Dairy, LLC production area.

Attachment A Sample Results

Sample ID	Sample Description (all liquid samples unless otherwise noted)	Date of the sample collection	Biochemical Oxygen Demand (mg/L)	Total Kjeldahl Nitrogen (mg/L)	Nitrate-Nitrite N (mg/L)	Ammonia as N (mg/L)	Total Phosphorus (mg/L)	Total Dissolved Solids (mg/L)	Total Suspended Solids (mg/L)	Fecal Coliform (CFU/100ml)
	<i>Typical limits</i>				<i>0.1*</i>		<i>.075***</i>			<i>200**</i>
S01	Liquid	April 20, 2017	149	11.3	1.78	4.78	4.48	NA	NA	32,000
S01-A	Liquid	April 21, 2017	12.0	3.57	13.8	1.00	1.31	492	6.4	NA
S02-A	Liquid	April 21, 2017	715	67.4	1.49	50.7	18.6	1540	302	5700
B01	Liquid	April 20, 2017	No blank	0.43	U	U	U	NA	NA	NA

U = Not Detected

In Wisconsin, there are no Water Quality Standards for Biochemical Oxygen Demand, Total Kjeldahl Nitrogen, Nitrate-Nitrite, Ammonia as Nitrogen, Total Dissolved Solids and Total Suspended Solids but a limit for Nitrate-Nitrite is provided and is meant to be a benchmark for comparison only.

* Maximum Nitrate-Nitrite amount for aquatic life (North Carolina State University Water Quality Group)

**Maximum Total Phosphorus limit for all other unidirectional streams/rivers not listed in Chapter NR 102.6 (3) (a) of Wisconsin Administrative Code.

***Although there are no effluent limits for CAFOs, the limit in Wisconsin for Fecal Coliform in a stream for general use is 200 colonies/100ml. (Chapter NR 102, Water Quality Standards for Wisconsin Surface Waters, November 2010 of the Wisconsin Administrative Code.)

- The Fecal Coliform results were analyzed by Pace Analytical Services, Inc., 1241 Bellevue Street, Suite 9, Green Bay, WI 54302.
- Ammonia Nitrogen, Total Phosphorus, Nitrate-Nitrite, Dissolved Solids (TDS), Total Suspended Solids (TSS), Total Kjeldahl Nitrogen (TKN), and Biochemical Oxygen Demand (BOD) were analyzed by the Region 5 Chicago Regional Laboratory.

ATTACHMENT B

Photos on April 20, 2017 from P4200021 – P4200031- are approximately one hour later than what is documented in the meta data of the camera.

Photos on April 21, 2017 from P42100064 – P421000154 are approximately one hour earlier than what is documented in the meta data of the camera.

Photo Number: P4200017

Description: Arrows in the photo depict the direction of flow of the two process wastewater pathways as they converge and flow through the culvert that runs under the 2nd driveway west of Lilac Lane.

Location: On County Road F, east of the 2nd driveway west of Lilac Lane.

Facing: Northwest

Date/Time: April 20, 2017 at 8:30 AM

Photo Number: P4200018

Description: Arrows in the photo depict the direction of the process wastewater pathways as they converge and flow through the culvert that runs under the 2nd driveway west of Lilac Lane.

Location: On County Road F, east of the 2nd driveway west of Lilac Lane.

Facing: Northwest

Date/Time: April 20, 2017 at 8:30 AM

Photo Number: P4200019

Description: EPA observed the process wastewater flowing off of the west side of the silage pad and flowing to the southwest through the grass depicted by the arrows. The flow of the process wastewater continues through the culvert under the 2nd driveway west of Lilac Lane discharging into the tile inlet.

Location: On County Road F, west of the 2nd driveway west of Lilac Lane on County Road F.

Facing: Northeast

Date/Time: April 20, 2017 at 8:31 AM

Photo Number: P4200020

Description: EPA observed the process wastewater that flowed off of the west side of silage pad and flowed southwest through the grassy area depicted by the arrows in the photo. The process wastewater flows through the culvert under the 2nd driveway west of Lilac Lane to the west and discharges into the tile inlet.

Location: West of the 2nd driveway west of Lilac Lane on County Road F.

Facing: Northeast

Date/Time: April 20, 2017 at 8:31 AM

Photo Number: P4200021

Description: EPA observed the process wastewater that discharged off of the silage pad to the east into the roadside ditch on the west side of Lilac Lane and flowed south toward County Road F as depicted by the arrows in the photo. The flow continues to the south around the bend flowing west in the roadside ditch along the north side of County Road F.

Location: On County Road F at the intersection of County Road F and Lilac Lane

Facing: North

Date/Time: April 20, 2017 at 7:35 AM

Photo Number: P4200022

Description: EPA observed process wastewater flowing west in the roadside ditch on the north side of County Road F. The arrows depict the direction of flow of the process wastewater in the roadside ditch. The process wastewater continues to flow west through the culvert under the 1st driveway west of Lilac Lane.

Location: On County Road F at the intersection of Lilac Lane and County Road F.

Facing: West

Date/Time: April 20, 2017 at 7:35 AM

Photo Number: P4200023

Description: EPA observed process wastewater discharging off of the east side of the silage pad into the roadside ditch west of Lilac Lane. The process wastewater flows south into the roadside ditch north of County Road F as depicted by the arrows in the photo.

Location: On County Road F at the intersection of County Road F and Lilac Lane.

Facing: North

Date/Time: April 20, 2017 at 7:35 AM

Photo Number: P4200024

Description: EPA observed process wastewater flowing through the culvert under the 1st driveway west of Lilac Lane and continuing to flow west toward the 2nd culvert that runs under the 2nd driveway west of Lilac Lane.

Location: On County Road F, east of the 1st driveway west of Lilac Lane on County Road F.

Facing: West

Date/Time: April 20, 2017 at 7:35 AM

Photo Number: P4200025

Description: EPA observed the two flow pathway discharging off of the silage pad converge and flow through the culvert under the 2nd driveway west of Lilac Lane on the north side of County Road F. Arrows depict the convergence of the two flow pathways of process wastewater.

Location: On County Road F, east of the 2nd driveway west of Lilac Lane.

Facing: Northwest

Date/Time: April 20, 2017 at 7:36 AM

Photo Number: P4200026

Description: EPA observed process wastewater that discharged off of the silage pad converge and flow through the culvert under the 2nd driveway west of Lilac Lane. Arrows depict the convergence of the process wastewater.

Location: On County Road F, east of the 2nd driveway west of Lilac Lane.

Facing: Northwest

Date/Time: April 20, 2017 at 7:36 AM

Photo Number: P4200027

Description: Culvert outlet on the south side of County Road F.

Location: On the public road right-of-way at the culvert outlet on the south side of County Road F and adjacent to Legend Farms Dairy, LLC.

Facing: Down

Date/Time: April 20, 2017 at 7:38 AM

Legend Farms Dairy, LLC
E3470 County Road F
Kewaunee, WI 54216
44.46N, 87.59W

Legend Farm Dairy, LLC

Topographically, the flow from the facility flows approximately 0.25 miles to the north or south to intermittent unnamed tributaries. Flow then goes approximately 0.89 miles to the perennial Krok Creek and then another 2.7 miles to perennial East Twin River.

Flow then goes 31 miles in the East Twin River to Lake Michigan.

The East Twin River is a Traditional Navigable Water approximately 3 miles from the mouth.

Lake Michigan is a Traditional Navigable Water throughout.

EPA inspectors observed flow from the facility goes through a culvert on the east side of the residential driveway and then under County Road F, outletting on the south side of County Road F. Flow goes south approximately two feet to a tile inlet.
